

EDGE WOODGRAIN RESIDENTIAL SOFFIT

Edge Residential Soffit is made from industry standard .019 gauge coil and textured for extra strength and a woodgrain appearance. Edge Residential Soffit features a distinctive board and bat profile, locks like a siding panel, and has a 12" width which allows the entire box to be cut on a standard trim saw. The 12" width also allows for easier layouts (20' eve needs 20 pieces). The siding style lock, coupled with the 12" width, allows you to span larger overhangs without panel sag or the risk of blowouts.

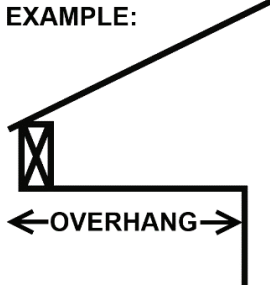

RESIDENTIAL (0.019")

- Standard Colors Only
- Box contain 12 panels at 8'1"
- Vented or solid panels available

COVERAGE CHEAT SHEET FOR RESIDENTIAL SOFFIT:

EXAMPLE:
